

Thermal packaging 

BOXES WITH FOAM

CATEGORY

Isothermal packaging

Insu Pack 6h

DESCRIPTION

We achieve maximum protection against abrasion and breakage of fragile products with foam-lined boxes and interiors.

These are especially suitable for fragile products vulnerable to abrasion caused by contact with cardboard; we design and manufacture these custom packaging solutions using foams of 1-3 and 5mm thickness.

We can apply foam to any flute of cardboard, whether E, B, C, or BC. With a special system separating the foam and cardboard, we create easily disposable packaging in the blue and yellow containers.

FEATURES

- ✓ Recycled materials
- ✓ Isothermal

DETAILS

- Designed for shipments of products with a duration of less than 6 hours.
- Packaging made from a composite material of corrugated cardboard and 2mm thick foam.
- With this material and the use of cold accumulators, we ensure that products using this packaging maintain the cold chain for these 6 hours without the need for refrigerated transport.

ADVANTAGES

- Space-saving in storage with folded boxes.
- Product protection against impacts.
- Ergonomic product that is easy to assemble.
- Suitable for food use.
- Easy recycling.
- Customisation available in up to 3 colours.
- 100% customisable dimensions. Inclusion of dividers, inner hives, etc., according to needs.
- Advice from the technical department for the proper adaptation of your products.
