

Thermal packaging 

INSU PACK 6H

CATEGORY

Isothermal packaging

Insu Pack 6h

DESCRIPTION

This is a packaging made of corrugated cardboard with a layer of reticulated polyethylene foam on its inner side, thus providing thermal insulation.

With this packaging, we can maintain a controlled temperature for shipments of up to 6 hours, whether using the box alone or with cold accumulators or other refrigerating elements.

We manufacture custom packaging, so we can fully personalise it. We can include dividers, hives, or any accessory your packaging may need.

FEATURES

- ✓ Isothermal
- ✓ Recycled materials
- ✓ Liderpark Award
- ✓ Foldable

DETAILS

- Designed for product shipments with a delivery time of less than 6 hours.
- Packaging made from composite materials of corrugated cardboard and 2mm thick foam.
- With this material and the use of cold accumulators, we ensure that products using this packaging maintain the cold chain for these 6 hours without the need for refrigerated transport.

ADVANTAGES

- Space-saving in storage as the boxes are presented folded.
- Protection of the product from impacts.
- Ergonomic product that is easy to assemble.
- Suitable for food use.
- Easy recycling.
- Possibility of customization up to 3 colours.
- 100% customizable dimensions. Inclusion of dividers, internal hives, etc., according to needs.
- Advice from the technical department for the proper adaptation of your products.
