

MOISTURE-PROOF BOXES

CATEGORY

Isothermal packaging

Eco+ Font

DESCRIPTION

Our barrier packaging is specially designed for use in humid environments. With the possibility of applying waterproofing on the inside and the outer face of the packaging, we ensure that our packaging is completely resistant to moisture.

We can apply the treatment to E, B, C, and BC flute boxes, and they are fully customizable. The treatment applied to the paper of these packages makes them suitable for food use and allows food to come into direct contact with the boxes.

Our barrier boxes are certified for recycling in the standard paper and cardboard methods according to EN 643:2014 regulations and can be disposed of without any issues in blue containers.

FEATURES

- ✓ They are foldable.
- ✓ 100% Recyclable
