## DESCRIPTION

Lidded cardboard boxes are a practical and efficient packaging solution for safely protecting your products. At our company, we offer a wide variety of lidded cardboard boxes in different sizes and materials to meet the needs of each customer. We manufacture different formats of lidded boxes, both self-assembling and manually assembled by operators.

The lidded box system allows the packaging to be used telescopically, enabling the height of the box to be adjusted within the same package, making it more versatile for shipping different quantities or products.

Our boxes are strong and durable, ensuring the protection of your products during transportation and storage. In addition, our boxes are designed to be easy to assemble and close, making them ideal for any type of business.
