Packaging and Shipping

Cardboard Boxes

E-commerce Packaging

DESCRIPTION

Functionality, sustainability, and an attractive design are essential for packaging to add value to the final product.

Both during the design and manufacturing processes, we offer different finishing options so that they can better suit your products and provide greater visibility at the point of sale.

In the case of automatic bottom packaging, all these requirements are perfectly met. Thanks to their design and manufacturing with 4 or 6 glued points, they reduce assembly time by more than 70% compared to conventional packaging.

FEATURES

- ✓ Quick assembly
- ✓ 100% Recyclable

APPLICATIONS

- Self-assembling formats, boxes, lids, complete sets.
- These packaging systems are particularly suitable for medium volumes.
- With the option of incorporating internal sealing tapes and Rapetape opening systems, these packaging systems are particularly suitable for e-commerce.

SOLUTIONS

Display and transport baskets for beverages.

With an automatic assembly format, these baskets are suitable for use with bottles or cans.

With capacities for cans or bottles from 25 cl to 1 L, they are an ideal solution for retail sales of these types of products.

Made entirely from corrugated cardboard, they are fully recyclable. Their design facilitates use both in stores and in factories.

Packaging with a self-assembling bottom for wines and cavas.

The bottom of the packaging creates the necessary separators to protect the bottles. Fully customizable, this is the most efficient packaging system for bottles on the market.

We offer a wide range of models for standard bottles available on the market.
