DESCRIPTION

FONT BOTTLEpack is a patented packaging system owned by Font Packaging Group, designed to ensure the safe and efficient shipment of all types of glass bottles.

Made from recycled and recyclable corrugated cardboard, it is a sustainable solution that creates a protective air chamber capable of absorbing impacts and preventing breakage during transportation. Its design can withstand free falls of up to 1.80 metres without damaging the bottles, while also reducing incidents caused by improper handling by up to 95%.

With over ten years of experience in the market, it has established itself as a benchmark solution in the sector, backed by international awards such as the World Star Packaging Awards, where it was recognized as the world's best beverage packaging, and the Liderpack Award for the best Spanish packaging.

FEATURES

- ✓ World Star Packaging Award
- ✓ 100% Recyclable
- ✓ Liderpack Award
- ✓ Protection
