

# Rigid Spools

## CATEGORY

Packaging and Shipping

Cardboard Spools

## DESCRIPTION

Designed and manufactured with a highly durable central core, they are suitable for winding heavy and tensioned products during the winding process.

Fully customizable, we design them tailored to your needs in collaboration with you for the perfect fit of the spool to your production line.

Patented ultra-resistant gluing system that prevents the core from separating from the sides.

By placing metal reinforcements in the bearing holes, we ensure perfect winding and unwinding of the product.

In summary, we are your best option if you need high-quality, durable, and customizable cardboard spools. Contact us for more information.
