Filling and Protection

DESCRIPTION

The paper pads in our packaging system are the most efficient padded paper strips on the market. We have crumpled paper machines for protection and filling, making this the ideal packaging solution for all products. The crumpled paper strips in the PAPERplus paper packaging system protect, secure, fill, and wrap.

With our crumpled paper machines, you can reduce and optimise the consumption of crumpled paper used, thereby increasing the efficiency of our paper systems. Our paper machines produce higher-volume paper pads that provide maximum protection.

The Chevron paper filling system, unique on the market, consists of air-cushioned paper tubes that achieve maximum volume using the minimum amount of paper.

Shooter, a high-speed crumpled paper filling system that is economical, clean, and recyclable. This machine uses crumpled paper made from 100% recycled paper rolls, significantly reducing costs while protecting the environment.

FEATURES

- ✓ Foldable
- ✓ Protection
- ✓ Filling

PROTECTION AND FILLING

Air Cushions

- A fully versatile product, with an air cushion for every application.
- Manufactured from three-layer materials that ensure the strength of the cushions.
- The plastics used are recyclable or compostable in accordance with DIN Certco EN 13432.
- On-demand manufacturing system, minimising storage space requirements.
- We adapt the machine's placement on the production line to improve packaging process efficiency.

Paper Pads

- A wide range of filling and protection solutions made from recycled paper.
- Improved mechanical performance thanks to crumpling techniques for greater efficiency.
- Consistent paper quality thanks to controlled paper manufacturing.
- Reduced warehouse space thanks to the on-demand usage system.

Foam Pads

- High mechanical strength makes this an extremely impact-resistant product with excellent cushioning properties.
- Superior quality provides the same cushioning effect as other foams with 45% less material.
- Suitable for all applications.
- Adapts perfectly to the product's shape within seconds.
- On-demand system saves material storage space.
- Recyclable product.

Eco Care

- 100% recycled product, made from our manufacturing waste.
- Adapts perfectly to any type of product.
- Supplied in boxes with pre-cut material, making it easy to use and place on the production line.
- Thanks to its flexibility, it can form protective and filling cushions with a high capacity for impact absorption.
