DESCRIPTION

Our packing chips are made from 100% corn starch, making them eco-friendly and compostable.

This product is certified to the NF T51-800 standard. The material automatically fills all the gaps in the package, ensuring that your products are safe throughout the entire logistics process of transport and storage.

An exceptionally eco-friendly and biodegradable packing chip cushioning material, made from 100% corn starch.

It is a product certified to the NF T51-800 standard. They are odourless and attract virtually no dust. The complete cushioning formed by bio chips is easily and quickly inserted into the cardboard box.

The material automatically fills all the gaps in the package, ensuring that your products are safe throughout the entire logistics process of transport and storage.
