INDUSTRIAL BAG IN BOX

CATEGORY

Large packaging

Containers for liquids

DESCRIPTION

The Bag in Box is an ideal container for liquids or semi-liquid food with capacities ranging from 2.5 litres to 30 litres. We offer a wide variety of sizes and a broad range of different types of bags suitable for each product's needs; taps, stoppers, dispensers...

It is the perfect substitute for plastic jerrycans, as it has many advantages: maximum hygiene, takes up little space in storage (delivered folded), is recyclable, and its presentation can be customised...

The Bag in Box is suitable for food liquids and semi-liquid food; tomatoes, fruit and vegetable juices, coffee, milk... as well as for all types of industrial liquids.

We have approved Standard containers with permanent stock. These containers are certified for ADR, ICAO, RID, and IMDG.

We also offer a comprehensive homologation service, where a team of experts will manage the entire process from designing the optimal packaging to handling documentation and shipments in approved laboratories.

FEATURES

- ☒ Liquids
- ☒ 100% Recyclable
