

Large containers 

ODL04

CATEGORY

Large packaging

Containers for liquids

DESCRIPTION

In the manufacturing of our industrial boxes, we can use materials such as wood to reinforce the mechanical properties of the boxes in terms of expansion and stacking.

The woods used as reinforcements can be fumigated and treated thermally to comply with all export regulations.

FEATURES

- ☒ Liquids
- ☒ Heavy Duty
- ☒ 100% Recyclable
- ☒ Bulk goods
- ☒ Liderpack Award
- ☒ Self-assembling

COMPONENTS

- **Container (corrugated cardboard)**

Outer ring (Triplex)

Inner ring (AC)

Foldable base (BC)

Reinforcement flaps (B)

Lid and base (BC)

Upper fastening (BC)

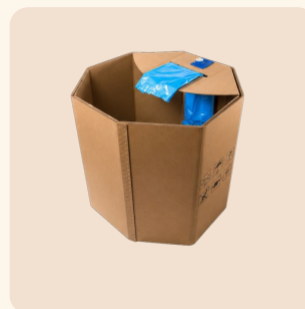

- **Bag**

Material: 3 layers of MLLDPE 60 MY (temperature range -20°C to +70°C)

Discharge valve: 2" BSP thread + membrane + cutter

Filling valve: 2" BSP thread
(STANDARD 100 L FAST FILL)

- **Assembly**

- **Features**

External dimensions (without pallet): 1135mm x 1135mm x 1105mm

Capacity: 1000 litres

Vertical compression under static load: 5000Kp.

Empty weight per unit: 24 kg

- **Palletisation**

10 units (On EUR pallet 120x80)

Perimeter: 1900x1199x1150mm

Pallet weight for 10 units: 250kg (shrink-wrapped pallet)
