

Large containers 

OML

CATEGORY

Large packaging

Containers for liquids

DESCRIPTION

The OML 1000 is a manually assembled octagonal container made of corrugated cardboard, consisting of 4 cardboard parts plus the bag, with a capacity of 1000 litres.

The components of the container include an outer ring, an inner ring, a lid, and a base. Its competitive price-quality ratio makes it an ideal container for single-use shipments worldwide.

The bag is suitable for food contact and can be aluminised, irradiated, and have barrier materials depending on the product being transported.

The container is delivered disassembled, and we can supply bags as a fifth element of the container. It is 100% customisable and all its components are 100% recyclable.

FEATURES

- ☒ Liquids
- ☒ Heavy Duty
- ☒ 100% Recyclable
- ☒ Bulk goods

COMPONENTS

- Minimum pack of 50 units
- Each component is placed on its corresponding pallet.
- 3 pallets of components.
- The bag is not integrated; it is supplied separately, or the customer can use their own bag.
- Bottom hole for placing a discharge valve.
- The OML is not stackable.
- Possibility to complement with a ramp.
- External dimensions: 1140x1140x1250.
