

# FAST BIN

## CATEGORY

Large containers

Fast bin

## DESCRIPTION

The Fast Bin is a cardboard octabin with an automatic bottom, designed for bulk products and capable of supporting loads over 1000 kg.

Its automatic bottom significantly reduces assembly time by eliminating the need for a lower lid, simplifying the process. This removal of material also improves logistics efficiency, both in storage and transport.

The inclusion of a self-assembling top lid further optimises the assembly time of these containers. The Fast Bin is an effective and practical solution for handling bulk products.

## FEATURES

- ☒ Self-assembling
- ☒ Heavy duty
- ☒ 100% Recyclable
- ☒ Quick assembly
