

INDUSTRIAL BOX WITH WOOD

CATEGORY

Large containers

DESCRIPTION

In the manufacturing of our industrial boxes, we can use components such as wood to reinforce the mechanical properties of the boxes in terms of both expansion and stacking.

The woods used as components can be fumigated and treated thermally to comply with all export regulations.

- Over 30 years of designing and manufacturing industrial packaging.
- Die-cut formats of up to 5 meters in length.
- Direct printing of up to 3 colours. Interior protection and fastening system for product safety.
- The Industrial Box with Wood is a comprehensive industrial packaging system, consisting of a wooden, plastic, or cardboard pallet and all packaging components in corrugated cardboard.
- 5 different formats of KITS, made of cardboard with wood or corrugated cardboard.
- We work with complementary materials to create complete packaging (foam, VCI, polypropylene, tubes, corner protectors...).
- Maximum logistical efficiency, as it is presented folded.
- Control of the wood manufacturing process.

FEATURES

- ☒ 100% Recyclable
- ☒ Heavy Duty
