

CONSUMPTION KIT

CATEGORY

Large containers

Industrial packaging KITS

DESCRIPTION

The consumption kit consists of an outer cardboard body glued to the wooden pallet along with a custom-made inner ring, according to the weight and stacking specifications of the product to be packaged, and a lid to cover the entire product. It features corner protectors to withstand the stacking of containers. This kit is especially suitable for large volume and weight products.

It is easy to assemble and use thanks to its pre-assembled and folded presentation, thus reducing logistical costs of assembly and storage as the space it occupies is equivalent to the perimeter of the base of the pallet.

- The consumption kit consists of an outer strap in foldable channels b or c, an inner ring, a lid, and a pallet.
- It is presented folded and its assembly is easy and quick due to the folds of the pieces.
- Especially suitable for heavy loads thanks to two straps.
- We can also manufacture it in Cellular Polypropylene to enhance its reusability.
- It can be made in any pallet size. We condition interiors to protect the contents and it can include windows and other necessary accessories.

FEATURES

- ☒ Heavy duty
- ☒ Foldable.
- ☒ 100% Recyclable
