

Large containers 

OCTABIN FOR MEAT PRODUCTS

CATEGORY

Large containers

Octabin for solids

DESCRIPTION

The transportation and storage of large refrigerated meat pieces is the aim of our octabin for meat products.

Due to the folded presentation of the product, it maximizes space in transport and storage compared to its competitors, the plastic containers.

Single-use and recyclable, it is particularly suitable for all types of export.

FEATURES

- ☒ 100% Recyclable
- ☒ Heavy duty
- ☒ Bulk goods

DESIGN

- The containers for meat products can be used in two formats: one with a base and ring, or with a base ring and lid, depending on the refrigeration needs of the product, one form or the other will be used.
- They are manufactured in both regular and irregular formats.
- A supplementary strap can be added to increase resistance to expansion.
- We can produce different qualities and sizes.
- It is suitable for use in food and humid environments.
- It is a 100% customizable, recyclable, and biodegradable product.

ADVANTAGES

- The container is presented folded, reducing storage space.
- It is suitable for export without the need for treatments.
- Closure systems include tails, tapping, or staples.
- A versatile system that adapts to the mechanical needs of the product.
