

CELLS AND DIVIDERS

CATEGORY

Thermal packaging

Cells and dividers

DESCRIPTION

Cardboard cells and dividers are essential solutions for the secure packaging of products. They are designed to separate and protect individual items within a box, preventing damage during transport.

Made from recyclable cardboard, they are an eco-friendly option that also offers strength and durability. They are ideal for a variety of industries, including food, beverages, pharmaceuticals, and electronics.

Available in different sizes and configurations, they adapt to the specific needs of each customer, ensuring maximum protection and efficiency in packaging.

FEATURES
