

CUSTOM DESIGNS

CATEGORY

Protection and Fixation

Moulded Cellulose

DESCRIPTION

We design interior protection and positioning systems using moulded cellulose. 100% made from recycled corrugated cardboard, it is the most eco-friendly protector on the market.

We offer various finishing formats to ensure that the product arrives in perfect condition at your customers' homes.

FEATURES

☒ 100% Recyclable

MOULDED CELLULOSE

- Moulded cellulose is a 100% recycled and recyclable product made from recovered paper and water.
- Through a moulding and drying process, we create packaging that perfectly adapts to the products being packed.
- We design the moulds and control the production process to achieve the most efficient products.
- We manufacture custom products and also offer standard products.

PRODUCTION PROCESS

Raw Material
