

BOTTLE PROTECTOR

CATEGORY

Protection and Fixation

Moulded Cellulose

DESCRIPTION

At Font Packaging Group, we offer various formats for placing different types of wine or cava bottles in boxes horizontally.

The cellulose systems ensure product stability during palletised transport, improving the reception of these by end customers. With soft finishes, they are non-abrasive to both the glass of the bottle and the label.

FEATURES

- ☒ Recycled Materials
- ☒ 100% Recyclable
- ☒ Protection

MOULDED CELLULOSE

- Moulded cellulose is a 100% recycled and recyclable product made from recovered paper and water.
- Through a moulding and drying process, we create packaging that perfectly adapts to the products being packed.
- We design the moulds and control the production process to achieve the most efficient products.
- We manufacture custom products and also have standard products available.
