

# CARDBOARD EDGE PROTECTORS AND PROFILES

Edge and corner protection for industrial packaging.

## CATEGORY

Protection and Securing  
cArtù Interiors

## DESCRIPTION

cArtù® cardboard edge protectors and profiles are designed to protect edges, rims, and corners — the areas most exposed to impacts during transport, storage, and handling.

They act as structural reinforcement for the packaging, improving compression strength and providing load stability. Their use reduces damage, optimizes stacking, and ensures product integrity throughout the logistics chain.

Made from recyclable cardboard, they are a sustainable alternative to plastic solutions, maintaining high technical performance in demanding industrial environments.

## FEATURES

- ✓ Effective protection of edges, rims, and corners.
- ✓ High resistance to vertical compression.
- ✓ Improved stability for palletized loads.
- ✓ Reduction of damage during transport.
- ✓ Adaptable to multiple formats and dimensions.
- ✓ Easy integration into any packaging system.
- ✓ Recyclable and sustainable material.
