

CUSTOM PROTECTION

Protection, cushioning, and technical packaging systems.

CATEGORY

Protection and Securing
cArtù Interiors

DESCRIPTION

cArtù® custom protection solutions are designed to block, secure, and cushion products within the packaging, guaranteeing stability throughout the logistics process.

Through personalized designs, they allow for the development of technical interiors adapted to the product's geometry, ensuring a perfect fit and optimal protection against impacts, vibrations, and movements.

They are especially suitable for fragile products, industrial components, or high value goods where transport safety is critical.

FEATURES

- ✓ Total product securing within the packaging.
- ✓ High shock and vibration absorption.
- ✓ Custom technical design (die cuts).
- ✓ Perfect fit to the product's geometry.
- ✓ Reduction of breakages and logistics incidents.
- ✓ Improved transport safety.
- ✓ Packaging system optimization.
