

# VOID FILL AND SECURING

Interior void fill and securing solutions for packaging.

## CATEGORY

Void Fill and Securing  
cArtù Interiors

## DESCRIPTION

cArtù® void fill and securing solutions allow the interior of the packaging to be adapted to the product, ensuring immobilization and preventing movement during transport.

These solutions combine wrapping, separation, and gap filling functions, providing both surface and structural protection. Their application optimizes packaging volume, improves logistics efficiency, and reduces incidents caused by shocks or vibrations.

Thanks to their lightness and flexibility, they adapt to various industries from commerce to automotive or consumer goods.

## FEATURES

- ☑ Product immobilization within the packaging.
- ☑ Protection against scratches, impacts, and vibrations.
- ☑ Effective separation between parts.
- ☑ Filling of empty spaces (void fill).
- ☑ Reduction of damage and returns.
- ☑ Optimization of volume and logistics costs.
- ☑ Lightweight, adaptable, and recyclable solution.
